An elegant re-brand for 25 Years of Excellence

South East Coachworks converted this bus for Elemis Spa back in 2010. We have made many tweaks and changes over the past five years, but this year we are giving the bus a complete revamp for its 25 years of Excellence tour. SEC will also be re-trimming the seats to match the new full vinyl wrap on the exterior of the bus which was completed in house by SEC Signworks. And it doesn't stop there, the interior of the bus has also been updated with new vinyl graphics and shiny new stainless steel floor covers!

AEC Regent's route diverts to SEC

This 1950's AEC Regent is owned by Mr Paul Baker. The bus featured in our 'Quirky Quintuplet' story in the November 2014 newsletter, but a lot has happened since then! We're now in full swing of replacing ceilings, fabricating new flooring & rebuilding framework on this superb vintage bus. Watch this space for photos of the finished restoration!

Carriage Seats run out of steam!

The Kent & East Sussex Railway is the country's finest example of a rural light railway. The line winds its way from Tenterden for ten and a half miles, through the unspoiled countryside of the Rother Valley all the way to the magnificent National Trust castle at Bodiam. South East Coachworks were asked to refurbish & re-trim the luxury seats from one of the carriages & we were delighted to take on the work & be a part of this unique refurbishment project.
